

Security Surveying & Design

5 Day Course

(BTEC Level 4)

Why this course

This very practical course uses a real site which will be visited during the course to teach delegates how to carry out a security survey, to make recommendations based on security management best practice and to write up and present a survey report.

Prior to the course, to ensure all participants have the same basic understanding of security design principles, a pre-course reading assignment will be distributed to all delegates.

During the course participants will complete a workbook which forms the basis of the BTEC Level 4 accreditation and prepare and deliver a presentation within a syndicate group.

Who will benefit

This course is ideal for those who have responsibility for the physical security of company locations or who wish to increase their skill sets in preparation for future career progression.
