

CERTIFIED DEVOPS SPECIALIST

About The Certification

The DevOps Specialist track comprises three courses that develop skills in DevOps practices, processes, metrics and models. The final course module consists of a series of lab exercises that require participants to apply their knowledge of the preceding courses in order to fulfill project requirements and solve real world problems. Completion of these courses as part of a virtual or on-site workshop results in each participant receiving an official Digital Certificate of Completion, as well as a Digital Training Badge from Acclaim/Credly. To achieve the DevOps Specialist Certification, Exam DO90.01 must be completed with a passing grade.

A Certified DevOps Specialist understands the requirements to successfully apply DevOps in support of achieving project objectives and realizing strategic business goals. Along with a solid understanding of DevOps process stages, techniques and models, a Certified DevOps Specialist is also required to be proficient in the monitoring and measuring of DevOps initiatives to ensure that entire project lifecycles are carried out as planned.

Core Modules

DevOps Module 1 – Fundamental DevOps

This module provides a comprehensive overview of DevOps practices, models and techniques, along with coverage of DevOps benefits, challenges and business and technology drivers. Also explained is how DevOps compares to traditional solution development and release approaches and how the application of DevOps can be monitored and measured for concrete business value.

Fees for DevOps for Module 1 Only: ~~US\$ 198~~ US\$ 99

DevOps Module 2 – DevOps in Practice

This module delves into the application of DevOps practices and models by exploring how the DevOps lifecycle and its associated stages can be carried out and further identifying related challenges and considerations. In-depth coverage is provided for the application of Continuous Integration (CI) and Continuous Delivery (CD) approaches, along with an exploration of creating deployment pipelines and managing data flow, solution versions and tracking solution dependencies.

Fees for DevOps Module 2 Only: ~~US\$ 198~~ US\$ 99

DevOps Module 3

This module presents participants with a series of exercises and problems that are designed to test their ability to apply their knowledge of topics covered in previous courses. Completing this lab will help highlight areas that require further attention and will further prove hands-on proficiency in DevOps models, practices and strategies, as they are combined and applied to solve real-world problems.

Fees for DevOps Module 3 Only: ~~US\$ 198~~ US\$ 99

For Certification

If you are keen on obtaining a Certification, we recommend you purchase the Blockchain Architect Certification bundle as the bundled pricing works out cheaper than buying Modules individually. The bundle includes all the 3 modules. The purchase of this bundle gives you access to a 1 year subscription.
