

ASIS Associate Protection Professional® **(APP®) - Online**

Introduction

We are proud to be an ASIS Preferred CPE Training Provider.

We deliver training to help you get the very best results when you sit your ASIS APP (Associate Protection Professional) exam.

ASIS developed the APP certification to recognise those relatively new to the security industry with a Board certification. It is intended for those with one to four years of security management experience.

ASIS developed the APP® certification to fill the gap for those looking for a first certification in the security management career ladder.

The APP covers four key domains:

1. Security Fundamentals
2. Business Operations
3. Risk Management
4. Response Management

Who will benefit?

The ASIS APP is for those with 1-4 years of security management experience, and measures the professional's knowledge of security management fundamentals, business operations, risk management, and response management.

ASIS APP is a Board certification, which is internationally-recognised as a security management accreditation. Holders of the APP can use the post-nominals 'APP', ie 'Katie Smith APP'.

How you'll learn

To give you the best possible chance with your exam, this online training course directs you to the relevant parts of the ASIS APP reference materials. Hosted on our online learning platform, you will study one module at a time, completing knowledge assessments and practice exam questions, revise the materials within the key domains, and assess your existing knowledge of the subject covered.

To go alongside the online training, you will need your own copy of the ASIS APP reference material which you can buy from www.asisonline.org. Please note that you are responsible for booking the exam – full details of this process can be found [here](#).

Eligibility Criteria

Security Management Experience:

- One year: Master's degree (or international equivalent) in Security Management
- Two years: Bachelor's degree (or international equivalent) in Security Management
- Three years: Bachelor's degree (or international equivalent) in any discipline
- Four years: No higher education degree

About The Exam

The exam consists of 100 scored multiple-choice questions and may also contain 25 randomly distributed "pre-test" (unscored) questions, for a total of up to 125 questions. The time allowed takes into consideration the review of pre-test items. The exam covers tasks, knowledge and skills in four primary domains that have been identified by experienced security professionals as required areas of competency in this field.
