

# **Security Management Stage 1: Security Coordination and Design**

**20<sup>th</sup> – 24<sup>th</sup> June 2027**

**Holiday Inn Hotel, Muscat, Oman**

## **About the course**

Delivered by our recognised security management trainers, this course is a comprehensive introduction to the essentials of corporate security management. Suitable for all levels, the training is perfect for those wishing to understand the fundamentals of security.

It is designed to provide security managers, supervisors, and those for whom security is one of a number of responsibilities, with the knowledge and confidence necessary to manage a successful security management function. You will learn the fundamentals of security management with an emphasis on risk methodology and designing appropriate security measures.

Identifying assets, threats and vulnerabilities leads to the design of physical security countermeasures. The course focuses on the core requirements to secure people and other critical assets, including risk assessments, risk matrix creation, and how to prepare a business case for security provisions to a senior management team.

This programme takes the form of lectures, workshops, discussions and exercises. Learners are placed into groups and are tasked to solve typical security problems together.
